

Tweddit Brief Demo

Commands:

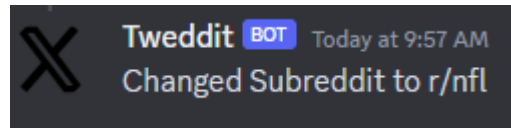

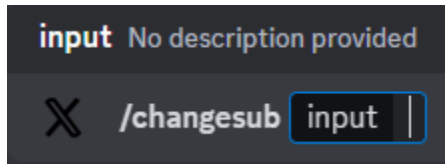

- /refresh: Will check for no, non-duplicate reddit posts in the chosen subreddit and indicate how many posts were found.

Will then post the results in the chosen discord channel.

- `/changesub`: Will prompt the user to enter the name of the subreddit they would like to switch to and switch to that subreddit if it exists.

- `/clean`: Will make the bot forget all existing posts, allowing the same posts to be added again.
